Features

Locking System

Step Lock

Step on first step and step lock automatically engages the rubber feet and locks the ladder to the ground surface. Step on pedal and locking system disengages.

Spring Loaded Casters

Retracts under weight of individual and rubber feet drop down and grip floor surface preventing the ladder from moving.

General Information

Construction

All-Welded (WL)

Entire Ladder is welded. Requires no assembly.

KD150 (RW)

Minimal assembly required. Guardrail and handrail assemblies fully welded.

KD Flatpack (KD)

Assembly required. Ships completely flat for maximum freight savings.

Packaging

Optional

Protective crating is optional on all models. Contact us for pricing.

Step Treads

Perforated

Perforated hole pattern and solid step provides excellent slip-resistance, self-cleaning and durability.

Grip Strut

Grip Strut provides the most aggressive slip-resistance and self-cleaning properties.

Ribbed

Aluminum extruded tread with ribbed grooves provides a high level of slip-resistance.

Options

Safety Walk

Optional Safety Walk solid step with anti-skid adhesive provides good slip-resistance and aesthetics.

Deep Top Step

Adds additional working space to top platform for safety and comfort.

D2 (Steel)

Adds 10" of additional depth

D3 (Steel)

Adds 20" of additional depth

D4 (Aluminum) & D6 (Stainless)

Adds 7" of additional depth

D5 (Aluminum) & D7 (Stainless)

Adds 14" of additional depth
